Tyler Sawatzky Bio:

Never envisioning a career in insurance, an entry-level position as an underwriting processor enabled a number of policy-side positions (auto underwriter, licensed agent/financial representative) between 1997 - 2004. After taking a few years away from insurance to own and operate a construction business, he returned to the insurance industry with The Claims Network in 2011. The Claims Network was a Canadian contents valuation company, looking to gain a foothold in the US market. edjuster was a similar company, with a stronger hold on the Canadian market.

With edjuster's acquisition of The Claims Network in 2012, Tyler had the privilege of being the only US-based field representative until the summer/fall of 2013. Seizing this opportunity, Tyler advanced with the growth of the US market and was named Regional Manager in January 2014. Later that same year, he was named Interim Manager of Western and Atlantic Canada, in addition to the US Region, and held that position through August of 2016. With significant increases in US claim volume and staffing, the need for US-focused management became necessary. Overseeing a 300% increase in staff, the licensing of field personnel, and new service development, Tyler was named National Field Manager in July 2017.
