

David G. Hooper II
Madsen, Kneppers & Associates, Inc.
Microbiologist

Mr. Hooper is a Microbiologist with more than 14 years of experience working on indoor air quality and microbiological risk evaluation projects in residential, commercial, educational, and governmental buildings throughout the United States.

Mr. Hooper has a wide range of experience including moisture mapping, microbiological sampling and data interpretation, as well as development and implementation of a scope of work for recovery efforts. He has experience in cause and origin investigations for water into building structures, as well as providing expert witness testimony.

Mr. Hooper has served on catastrophe response teams in response to natural disasters. He has prepared microbiological impact documents, provided project oversight and management, and has conducted quality control investigations following the completion of work by contractors, and has performed worker and life safety monitoring during recovery efforts.

Prior to joining *Madsen, Kneppers & Associates, Inc.*, Mr. Hooper has had extensive microbiology laboratory experience. He spearheaded efforts for Micro Air, Inc. to become the first AIHA EMLAP accredited laboratory in the state of Indiana. Mr. Hooper has experience in developing protocols for identification of fungi and bacteria from different strata. He served as the Quality Assurance/Quality Control Coordinator for the laboratory for over seven years.

Mr. Hooper graduated from the University of Pittsburgh with a Bachelor of Science in Microbiology in 1997. He graduated with a Master of Science in Microbiology from Clemson University in 2001.
