**Forensic Cause & Origin Evaluations**  
**Large and Complex Facilities Analysis**  
**Water and Moisture Investigations**  
**Commerical, Heavy Industrial &**  
**Health Care Mechanical Systems**

**Steven M. Lemmo, PE**  
*Director/Senior Mechanical Engineer*

Mr. Lemmo has over 30 years of experience in the design, construction supervision and commissioning of large HVAC Systems. His experience includes commercial, educational, pharmaceutical, healthcare, manufacturing and power generation facilities. In addition to his extensive design experience, he has personally performed mechanical system investigations in over 100 large facilities throughout the United States.

His range of investigative work includes design review, construction inspection, diagnostic/failure analysis, pollutant migration, energy efficiency evaluations, and indoor air quality investigations. Mr. Lemmo's ability to assess the cause of mechanical system deficiencies both quickly and accurately has enabled him to provide strong leadership to HEA's Forensic Analysis/Cause & Origin Team.
