

Ron Richardson is an AVP for Geomni, a Verisk Analytics business specializing in technologies related to image capture and analysis. Ron's tenure with Verisk started with Xactware in 2009, before which he owned and operated a residential construction company and has worked in the property and casualty insurance industry since 1989. Ron is a subject matter expert for construction and insurance-related aspects related to image capture and analysis. Ron has received a Bachelor of Arts degree and obtained the Chartered Property and Casualty (CPCU) and Chartered Financial Consultant (ChFC) designations.
